
Unleashing Potential of Mix Augmentation for Partial-Label Learning

Anonymous Authors¹

Table A. The magnitude change of local ambiguity degree before (white columns) and after UMiP augmentation (gray columns).

Ambiguity Level	Class-dependent <u>0.7/0.8/0.9</u>		Instance-dependent <u>0.6/0.8/1.0</u>	
Low level	0.780	0.706	0.973	0.958
Medium level	0.869	0.851	0.987	0.969
High level	0.978	0.925	0.993	0.974
